Vol. 11, No. 4, pp. 486–488
© 1997 Lippincott–Raven Publishers, Philadelphia

Journal of Voice
Cumulative Subject Index, 1997

Acoustic analysis, voice
acute laryngitis, 356
adult African-American voice, 410
after botulinum toxin and acupuncture, for adductor spasmodic dysphonia, 232
after thyroidectomy, 479
with amyotrophic lateral sclerosis, 222
dopaminergic drug treatment effects, Parkinson's disease, 314
effects of relative humidity of inhaled air, 295
vocal presentation, gender differences, 307

Acoustics, formant frequency development, 260

Acting
children
laryngologist's perspective, 126
speech-language pathologist's perspective, 130
in mature adult, 161
singing instruction perspective, 165
young adult, singing instruction perspective, 153

Acupuncture, botulinum toxin and, for adductor spasmodic dysphonia, 232

Adduction
laryngeal, pressure-flow relations during phonation, 187
membranous contact quotient, measure of glottal competence, 277
vocal fold, related to voice onset, 12

Aerodynamic analysis
acute laryngitis, 356
adult African-American voice, 410

African-American adult, voice, aerodynamic and acoustic characteristics, 410

Aging, adult voice and, 156

Air, inhaled, relative humidity of, effects on acoustic parameters of voice, 295

Airway
laryngeal, resistance, function of adduction, 187
obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115

Allergy, young adult voice, 138

Amyotrophic lateral sclerosis, voice with, acoustic analysis, 222

Aperiodicity, fractal dimension of fundamental frequency, box-counting method, 437

Articulation
pitch and vowel, dependence of jaw openings on, singers, 301
singing/acting mature adult, instruction perspective, 165

Auditory feedback, pitch-shifted, voice fundamental frequency response to, 202

Book review, *Surgery for Cancer of the Larynx and Related Structures,* 2nd Ed., 483

Botulinum toxin
acupuncture and, for adductor spasmodic dysphonia, 232
type A, paradoxical vocal fold movement, 368

Box-counting method, fractal dimension of fundamental frequency computed by, 437

Breathing. *see* Respiration

Bronchi, dysphonia and subglottic obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115

Carcinoma. *see* specific site or type
Chemotherapy, vocal fundamental frequency and response to, laryngeal cancer, 33
Chest x-ray, evaluation of vocal fold immobility, 364
Children. *see* Pediatrics
Circumlaryngeal therapy, manual, for functional dysphonia, 321
Computer program, sound pressure level, conversion of head-mounted microphone signal into, 417
Coping strategies, vocal fold nodules and polyps, 452
Cricothyroid, pars recta and pars oblique, in fundamental frequency control, 48
Cricothyroid distance, strap muscles in phonation, canine laryngeal model, 23
Crossdresser, gender presentation of voice, perceptual and acoustical analyses, 307

Development, vocalization and breathing, second and third years of life. *see* Respiration
Diplophonia, fractal dimension of fundamental frequency, box-counting method, 437
Dysphonia
aging adult voice, 156
functional
manual circumlaryngeal therapy for, 321
psychological correlates of, 443
laser bronchoscopy for, with transglottic/supraglottic ventilation, 115
spasmodic, adductor
botulinum toxin and acupuncture for, 232
evaluation of symptoms and severity, 95
vocal fold scar, autologous fat implantation for, 238
Dystonia
focal laryngeal, evaluation of symptoms and severity, 95
laryngeal, paradoxical vocal fold movement, 368
spasmodic, muscle misuse, pattern recognition in, 108

Elastin, constituents, intermediate layer of normal vocal folds, 59
Electroglottography, vocal exercise, physiological aspects of, 171
Electrolarynx, phonation with, speech performance of adult Cantonese-speaking laryngectomies, 338
Electromyography
laryngeal, preoperative voice therapy in paralysis, 88
pars recta and pars oblique activity, in fundamental frequency control, 48
Endotracheal intubation, laser bronchoscopy with, to relieve dysphonia, 115
Epidemiology, voice disorder, teachers', frequency and effects, 81
Exercise physiology, vocal performance and, 332

Female voice. *see also* Gender differences
with bilateral vocal nodules, mean phonation duration changes, 462
comparison of intensity measures, stability and, 178
reading, speech breathing during, with vocal nodules, 195
Flexibility, singing/acting mature adult, instruction perspective, 165
Fundamental frequency
fractal dimension of, box-counting method, 437
phonation, role of strap muscles in, canine laryngeal model, 23
voice response, pitch-shifted auditory feedback, 202

Gastroesophageal reflux disease, paradoxical vocal fold movement, 368
Gender differences
comparison of intensity measures, stability and, 178
vocal presentation, perceptual and acoustic analyses, 307
Glottis
obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115
width, membranous contact quotient, 277
Granulation tumor, subglottic obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115
GRBAS Scale, perceptual rating of voice quality, experience and background effects, 74

Histology, vocal folds, elastin and hyaluronic acid constituents, 59
Hoarseness
acute laryngitis, some aerodynamic and acoustic characteristics, 356
vocal fold scar, autologous fat implantation for, 238
Humidity, inhaled air, effects on acoustic parameters of voice, 295
Hyaluronic acid, constituents, intermediate layer of normal vocal folds, 59
Hydration, singing/acting mature adult, instruction perspective, 165

Image analysis, intermediate layer, elastin and hyaluronic acid constituents, 59
Intensity range, comparison of measures, male and female speakers, 178
Interspeaker distances, speakers' vocal intensity, effects of perceived listeners, 67
Isshiki thyroplasty, modification of, 470

Jaw opening, dependence on pitch and vowel, singers, 301
Jitter, fractal dimension of fundamental frequency, box-counting method, 437

Lamina propria, vocal folds, elastin and hyaluronic acid constituents of, 59
Laryngeal nerve, recurrent, in paralysis, preoperative voice therapy and, 88
Laryngectomy, speech performance after, Cantonese-speaking patients, 338
Laryngitis, acute, some aerodynamic and acoustic characteristics, 356
Laryngospasm, episodic paroxysmal, 368
Larynx
adduction, pressure-flow relations during phonation, 187
cancer, advanced, tumor response to chemotherapy in, 33
membranous contact quotient, measure of glottal competence, 277
surgical anatomy, 345
vertical position, vocal exercise and, 171
Lifestyle, patients with vocal fold nodules and polyps, 452
Listeners, proximity, effect on speakers' vocal intensity, 67
Loudness, speakers' vocal intensity, effects of perceived listeners, 67
Luchsinger, Richard (1990–1993), an appreciation, 249
Lung volume, speech breathing during reading, women with vocal nodules, 195

Magnetic resonance imaging, comparison of vocal tract formants, 1
Male voice. *see also* Gender differences
comparison of intensity measures, stability and, 178
speaker's formant in, 422
Maturity
singing-acting voice and, 161
singing instruction perspective, 165
Maximum phoneme duration (MPD), variations in method of elicitation, 285
Membranous contact quotient, measure of glottal competence, 277
Microphone, head-mounted, vocal intensity and, 417
Minnesota Multiphasic Personality Inventory, psychology of functional dysphoria, 443
Muscle
misuse, in voice disorders, pattern recognition, 108
strap, role in phonation, canine laryngeal model, 23
Mutational voice, young adult, 138

Nasality, movement of the velum, during speech and singing, classically trained singers, 212

Occupational disease, voice disorder, teachers', frequency and effects, 81
Oxytalan, constituents, intermediate layer of normal vocal folds, 59

Paralysis
vocal cord, evaluation of, 364
vocal fold, nerve-muscle pedicle reinnervation and surgical medialization, 474
Parkinson's disease, dopaminergic drug treatment, effects on acoustic voice analysis, 314
Pars oblique, differential activity of, in fundamental frequency control, 48
Pars recta, differential activity of, in fundamental frequency control, 48
Pediatrics
formant frequency development, 260
singing-acting child
laryngologist's perspective, 126
speech-language pathologist's perspective, 130
singing teacher as vocal parent, 135
vocalization and breathing, second and third years of life. *see* Respiration
Perceptual analyses, vocal presentation, gender differences, 307
Perceptual evaluation, voice, effects of experience and professional background, GRBAS Scale, 74
Personality, coping strategies and, patients with vocal fold nodules and polyps, 452
Phonation
acoustic voice measure, reflection of tumor response to chemotherapy, laryngeal cancer, 33
aerodynamics of, function of adduction, 187
alaryngeal, speech performance of adult Cantonese-speaking laryngectomies, 338
initiation of, vocal fold adduction related to, 12
mean duration, women with bilateral vocal nodules, 462
membranous contact quotient, measure of glottal competence, 277
nonperiodic, singing and, comparison of vocal tract formants, 1
role of strap muscles in, canine laryngeal model, 23
singing/acting mature adult, instruction perspective, 165
Phonosurgery, surgical anatomy of the larynx, 345
Phototherapy, laser, dysphonia and subglottic obstruction, 115
Pitch
acoustic analysis, speaking voice after thyroidectomy, 479
dynamics of length change, canine vocal folds, 267
feedback, voice fundamental frequency response, 202
optimum, singing/acting mature adult, instruction perspective, 165
pars recta and pars oblique activity, in fundamental frequency control, 48
perturbation, reflection of tumor response to chemotherapy, laryngeal cancer, 33
Polyps, vocal, coping strategies for patients, 452
Posture
improvement of alignment, vocal performance and, 332
singing/acting mature adult, instruction perspective, 165
Presbyphonia, aging adult voice, 156
Pressure-flow relations, during phonation, larynx, 187
Psychological correlates, functional dysphoria, 443

Rating scale
adductor spasmodic dysphonia, 95
solo voice performance, evaluation, expert consensus, 429
Reading, speech breathing during, women with vocal nodules, 195
Resonation, singing/acting mature adult, instruction perspective, 165
Respiration
singing/acting mature adult, instruction perspective, 165
vocalization and, second and third years of life, 373

Singers
country, estimated subglottal pressure in, 403
healthy, variability in strobovideolaryngoscopy, 104
jaw openings, dependence on pitch and vowel, 301
young, singing teacher as vocal parent, 135
Singing
children
laryngologist's perspective, 126
speech-language pathologist's perspective, 130
comparison to nonperiodic phonation, vocal tract formants, 1
country singers, estimated subglottal pressure in, 403
high-pitched, dependence of jaw openings on pitch and vowel, 301
in mature adult, 161
singing instruction perspective, 165
movement of the velum during, classically trained singers, 212
solo voice performance, evaluation, expert consensus, 429
teachers of, vocal parenting, 135
young adult, singing instruction perspective, 153
Singing instruction
mature adult, 165
singing-acting young adult, 153
Sound pressure level
calibrated units, conversion of head-mounted microphone signal into, 417
estimated, country singers, 403
Sound synthesis, acoustic characteristics of rough voice, 40
Spasmodic dystonia. *see* Dystonia
Speaker's formant, male voices, 422
Spectral slope, speaker's formant, male voices, 422
Spectrum analysis
rough voice, subharmonic, 40
vocal tract formants, singing and nonperiodic phonation comparison, 1
Speech-language pathologist, perspective, singing-acting child, 130
Speech performance, adult Cantonese-speaking laryngectomies, 338
Strap muscle. *see* Muscle
Stress, coping strategies, patients with vocal fold nodules and polyps, 452
Stridor, laser bronchoscopy with transglottic/supraglottic ventilation, 115
Strobovideolaryngoscopy
dysphonia, laser bronchoscopy with transglottic/supraglottic ventilation, 115
laryngeal nerve paralysis, preoperative voice therapy in, 88
variability, healthy singers, 104
Subglottal pressure
estimated, country singers, 403
membranous contact quotient, 277
singing/acting mature adult, instruction perspective, 165
strap muscles in phonation, canine laryngeal model, 23
Subglottal resonance, vocal fold vibration effects, 391
Subglottis, obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115
Subharmonics, acoustic characteristics of rough voice, 40
Supraglottis, obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115
Surgical medialization, nerve-muscle pedicle reinnervation and, unilateral vocal fold paralysis, 474
s/z ratio
maximum phoneme duration, variations in method of elicitation, 285
mean phonation duration changes, women with bilateral vocal nodules, 462

Thyroidectomy, speaking voice after, acoustic analysis, 479
Thyroplasty
surgical anatomy of the larynx, 345
type I, Isshiki approach, 470
Tonsillectomy, young adult voice, 138
Trachea, dysphonia and subglottic obstruction, laser bronchoscopy with transglottic/supraglottic ventilation, 115

Ultrastructure, intermediate layer of vocal folds, elastin, and hyaluronic acid constituents of, 59

Velopharyngeal port, movement of the velum during singing, classically trained singers, 212
Velum, movement during speech and singing, classically trained singers, 212
Ventilation, supraglottic anesthetic, relief of dysphonia, 115
Videolaryngoscopy, paradoxical movement of vocal fold, 368
Video reviews
Assessment and Management Procedures for Voice Disordered Patients, 247
Vocal Tract Imaging. Use of Transnasal, Oral Endoscopy and Stroboscopy, 247
Videotracheobronchoscopy, dysphonia, laser bronchoscopy with transglottic/supraglottic ventilation, 115
Vital capacity, singing/acting mature adult, instruction perspective, 165
Vocal exercise, physiological aspects, 171
Vocal folds
adduction, related to voice onset, 12
intermediate layer, elastin and hyaluronic acid constituents, 59
length, strap muscle role in phonation, canine laryngeal model, 23
length change, canine, 267
nodules, coping strategies, personality, and voice quality with, 452
paradoxical movement, 368
scar, autologous fat implantation for, 238
unilateral immobility, evaluation of, 364
unilateral paralysis, surgical medialization and nerve-muscle pedicle reinnervation for, 474
vibration, subglottal resonance effects, 391
Vocal intensity
comparison of measures, male and female speakers, 178
effects of perceived listeners on, 67
head-mounted microphone signal and, 417
Vocalists, professional, 254
Vocalization, breathing and, second and third years of life, 373

Vocal nodule
bilateral, women, mean phonation duration changes, 462
singing-acting child, laryngologist's perspective, 126
women, speech breathing during reading with, 195
Vocal paralysis, unilateral, preoperative voice therapy in, 88
Vocal parenting, singing teacher, 135
Vocal pedagogy, children and adolescents, singing teacher as vocal parent, 135
Vocal performance, exercise physiology principles applied to, 332
Vocal performer, mature adult, 161
Vocal process gap, membranous contact quotient, measure of glottal competence, 277
Vocal quality, perceptual, amyotrophic lateral sclerosis and, 222
Vocal registers, vibration effects, subglottal resonance, 391
Vocal stamina, singing/acting mature adult, instruction perspective, 165
Vocal tract, formants
comparison in singing and nonperiodic phonation, 1
dependence of jaw openings on, singers, 301
frequency development, young children, 260
male voices, 422
Vocology, use of voice as primary tool of trade, 254
Voice
acoustic analysis, with amyotrophic lateral sclerosis, 222
acoustic measure, reflection of tumor response to chemotherapy, laryngeal cancer, 33
acoustic parameters of, effects of humidity of inhaled air, 295
adductor spasmodic dysphonia, evaluation of symptoms and severity, 95
adult, aging, 156
adult African-American, aerodynamic and acoustic characteristics, 410
effects of dopaminergic drugs for Parkinson's, acoustic analysis after, 314
gender presentation of, perceptual and acoustical analyses, 307
movement of the velum, during speech and singing, classically trained singers, 212
problems, teachers', frequency and effects, 81
professional, young adult, 144
rough, acoustic characteristics of, subharmonics, 40
singing-acting, mature adult, 161
singing instruction perspective, 153, 165
three ages of, 125–237
as a tool of trade, U. S. workforce, 254
vocal fold vibration, subglottal resonance effects, 391
young adult, 138
singing instruction perspective, 153
Voice abuse, young adults, 138
Voice disorders
children, speech-language pathologist's perspective, 130
functional, paradoxical vocal fold movement, 368
functional dysphonia, manual circumlaryngeal therapy for, 321
muscle misuse, pattern recognition in, 108
singing-acting child, laryngologist's perspective, 126
teachers', frequency and effects, 81
Voice onset, vocal fold adduction related to, 12
Voice performance, solo, evaluation, expert consensus, 429
Voice quality, perceptual evaluation, experience and background effects, GRBAS Scale, 74
Voice therapy
changes after, women with bilateral vocal nodules, 462
preoperative, in unilateral voice paralysis, 88
Vowel formants
male voices, 422
vocal tract, comparison in singing and nonperiodic phonation, 1
Young adult
mutational voice, 138
professional voice user, 144–146
singing-acting, singing instruction perspective, 153
singing teacher as vocal parent, 135

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of August 12, 1970: Section 3685, Title 39 United States Code) Date of Filing—October 1, 1997. Title of Publication—Journal of Voice; Frequency of Issue—4 issues per year; Annual Subscription Price—$109.00; Location of Known Office of Publication—Lippincott–Raven Publishers, 12107 Insurance Way, Hagerstown, MD 21740; Location of the Headquarters or General Business Offices of the Publisher—227 East Washington Square, Philadelphia, PA 19106; Publisher—Lippincott–Raven Publishers, 227 E. Washington Square, Philadelphia, PA 19106; Editor—Robert Thayer Sataloff, M.D., D.M.A., 1721 Pine Street, Philadelphia, PA 19106; Managing Editor—Caren P. Erlichman, Lippincott–Raven Publishers, 227 East Washington Square, Philadelphia, PA 19106; Owner—Lippincott–Raven Publishers, a wholly owned subsidiary of Wolters-Kluwer, US Corp., 227 E. Washington Square, Philadelphia, PA 19106, 36th Floor, 1185 Avenue of the Americas, New York City, NY 10036; Known Bondholders, Mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities—none. A. Total no. copies printed (*net press run*), average 1975, actual, 2000; B. Paid circulation 1. Sales through dealers and carriers, street vendors and counter sales, average none, actual none; 2. Mail subscriptions, average 1134, actual 1077; C. Total paid circulation, average 1134, actual 1077; D. Free distribution by mail, carrier or other means. Samples complimentary, and other free copies, average 196, actual 186; E. Total distribution (*sum of C and D*), average 1329, actual 1263; F. Copies not distributed 1. Office use, leftover, unaccounted, spoiled after printing, average 646, actual 737; 2. Returns from news agents, none; G. Total (*sum of E & F—should equal net press runs shown in A*), average 1975, actual 2000. I certify that the statements made by me above are correct and complete. Beverly V. Dietrich, *Circulation Director.*
